**FORM ADV PART 2A
BROCHURE**

This brochure provides information about the qualifications and business practices of Enza Financial. If you have any questions about the contents of this brochure, contact us at 216-236-0700 or visit our website at www.enzafinancial.com. The information in this brochure has not been approved or verified by the United States Securities and Exchange Commission or by any state securities authority.

Additional information about Enza Financial is available on the SEC's website at www.adviserinfo.sec.gov.

Enza Financial is a registered investment adviser. Registration does not imply a certain level of skill or training.

Item 2 Summary of Material Changes

Form ADV Part 2A requires registered investment advisers to amend their brochure when information becomes materially inaccurate. If there are any material changes to an adviser's disclosure brochure, the adviser is required to notify you and provide you with a description of the material changes.

The material changes in this brochure from the last annual updating amendment of Enza Financial, LLC on March 20, 2025, are described below. Material changes relate to Enza Financial, LLC's policies, practices or conflicts of interests.

- There are no material changes to this Form ADV Part 2A.

Item 4 Advisory Business

Description of Firm

Enza Financial is a registered investment adviser primarily based in Independence, OH. We are organized as a limited liability company ("LLC") under the laws of the State of Ohio. We are owned by Joseph Crea, Linda Cahill, and Scott Fischer.

The following paragraphs describe our services and fees. Refer to the description of each investment advisory service listed below for information on how we tailor our advisory services to your individual needs. As used in this brochure, the words "we," "our," and "us" refer to Enza Financial and the words "you," "your," and "client" refer to you as either a client or prospective client of our firm.

Portfolio Management Services

We offer discretionary portfolio management services. Our investment advice is tailored to meet our clients' needs and investment objectives.

If you participate in our discretionary portfolio management services, we require you to grant our firm discretionary authority to manage your account. Discretionary authorization will allow us to determine the specific securities, and the amount of securities, to be purchased or sold for your account without your approval prior to each transaction. Discretionary authority is typically granted by the investment advisory agreement you sign with our firm and the appropriate trading authorization forms.

You may limit our discretionary authority (for example, limiting the types of securities that can be purchased or sold for your account) by providing our firm with your restrictions and guidelines in writing.

We may also offer non-discretionary portfolio management services. If you enter into non-discretionary arrangements with our firm, we must obtain your approval prior to executing any transactions on behalf of your account. You have an unrestricted right to decline to implement any advice provided by our firm on a non-discretionary basis.

As part of our portfolio management services, in addition to other types of investments (see disclosures below in this section), we may invest your assets according to one or more model portfolios developed by an unaffiliated investment manager. These models are designed for investors with varying degrees of risk tolerance ranging from a more aggressive investment strategy to a more conservative investment approach. Clients whose assets are invested in model portfolios may not set restrictions on the specific holdings or allocations within the model, nor the types of securities that can be purchased in the model. Nonetheless, clients may impose restrictions on investing in certain securities or types of securities in their account. In such cases, this may prevent a client from investing in certain models that are managed by our firm.

Third-Party Managers

We may utilize the services of various third-party investment advisory firms, including sub-advisers, co-advisers and money managers (collectively referred to herein as "Third-Party Managers") to aid in the implementation of an investment portfolio. Before selecting a Third-Party Manager, our Firm will ensure that the chosen Third-Party Manager is properly licensed or registered as required. We will also conduct other due diligence on these managers before approving them to assist in managing our clients' accounts. In order to assist in the selection of a Third-Party Manager for a particular client, our Firm will gather client information pertaining to financial situation, investment objectives, and reasonable restrictions to be imposed upon the management of the account.

After that, if a Third-Party Manager is selected the account will be managed directly by the Third-Party Manager on a discretionary basis under our supervision. The Third-Party Manager will make any changes to the holdings or allocations that the Third-Party Manager deems appropriate in the account(s). If a Model Provider is selected, the Model Provider will provide certain model portfolio strategies and deliver trade recommendations for each strategy on a non-discretionary basis to our Firm for implementation in the account(s).

We will review the services of the selected Third-Party Manager on an ongoing basis. Furthermore, we have the authority, without further input from or permission of the client, to move client assets from one Third-Party Manager to another, terminate the services of a Third-Party Manager with respect to a client, or reallocate client assets between Third-Party Managers. In practice, we will typically provide clients with at least thirty (30) days notice prior to any such changes. We will also ensure any amendments to our agreement made necessary by these changes are effected in a timely manner.

We will contact clients from time to time in order to review their financial situation and objectives; communicate information to Third-Party Managers as warranted; and assist the client in understanding and evaluating the services provided by the Third-Party Manager. Clients will be expected to notify our Firm of any changes in their financial situation, investment objectives, or account restrictions that could affect their financial standing.

Financial Planning and Consulting Services

We offer financial planning and consulting services which typically involve providing a variety of advisory services to clients regarding the management of their financial resources based upon an analysis of their individual needs. These services can range from broad-based financial planning to consultative as described below and in Schedule A of our Financial Consulting and Planning Agreement. If you retain our firm for financial planning or consulting services, we will meet with you to gather information about your financial circumstances and objectives. We may also use financial planning software to determine your current financial position and to define and quantify your long-term goals and objectives. Once we specify those long-term objectives (both financial and non-financial), we will develop shorter-term, targeted objectives. Once we review and analyze the information you provide to our firm and the data derived from our financial planning software, we will deliver a written plan to you, designed to help you achieve your stated financial goals and objectives.

Individual Consulting and Planning

The financial consulting services that are offered are:

- Income Analysis/Cash Flow/Budget Analysis
- Investment Analysis/Asset Allocation
- Education Needs Analysis/Planning
- Retirement Needs Analysis/Planning
- Retirement Plan Review
- Life Insurance Review
- Disability Insurance Review including Policy Analysis
- Estate Analysis/Estate Planning Service
- Charitable Giving
- Employee Benefit Analysis
- Investment Counseling
- Other Investment Advisory Consulting Services as agreed upon

Comprehensive Financial Planning

Tier 1 (Individuals)

- Retirement Needs Analysis/Planning

- Goal Planning
- Income Analysis/Cash Flow
- Investment Review
- Disability & Life Insurance Review

Tier II (Business Owners, Multiple Entities, High Net-Worth Individuals, more than an Individual Estate)

- Includes all of Tier I
- Estate Analysis/Estate Planning Coordination with Your Advisory Team
- Charitable Giving Considerations

Tier III – (More Complex Estate)

- Includes all of Tiers I and II
- Advanced Estate Planning with your Advisory Team
- Business Planning with your Advisory Team
- Other Investment Advisory Consulting Services

Periodic Investment Advisory Consulting Service

- Portfolio Monitoring
- Group Retirement Enrollment/Education meetings
- Ongoing or periodic investment advisory consulting service as agreed upon

Plans are based on your financial situation at the time we present the plan to you, and on the financial information you provide to us. You must promptly notify our firm if your financial situation, goals, objectives, or needs change.

You are under no obligation to act on our recommendations. Should you choose to act on any of our recommendations, you are not obligated to implement the plan through any of our other investment advisory services. Moreover, you may act on our recommendations by placing securities transactions with any brokerage firm.

Retirement Plan Consulting Services

We offer retirement plan consulting services to employee benefit plans and their fiduciaries based upon the needs of the plan and the services requested by the plan sponsor or named fiduciary. In general, these services may include an existing plan review and analysis, consultation with the plan investment committee, preparation of an investment policy statement (IPS) in consultation with the plan sponsor, periodic review of the IPS in consultation with the plan sponsor, plan-level advice regarding fund selection and investment options including analysis of asset allocation, recommendations of specific investments, and creation of model investment portfolios, investment performance monitoring, preparation of periodic investment performance reports, participant advice and/or ongoing consulting. These retirement plan consulting services will generally be non-discretionary and advisory in nature. Not all of the retirement plan consulting services are provided to all clients. The particular services to be provided are described in the written agreement between the client and our firm.

We may offer discretionary management services to plans if authorized by the plan sponsor under a separate 3(38) discretionary services authorization. These services generally include selecting investment fund options available from the plan's recordkeeper to be offered under the plan, exercising decision making responsibility with respect to the selection of asset classes, the criteria for selection and monitoring of funds, the monitoring of the investment funds and all other investment decisions under the plan, and drafting an IPS for the plan, subject to approval by the plan's investment

committee. We may provide these services directly, or we may also utilize a Third-Party Manager to aid in providing these services.

We acknowledge that in performing the above retirement consulting services we are acting as a “fiduciary” as such term is defined under ERISA Section 3(21)(A)(ii) for purposes of providing investment advice only. We further acknowledge that in a discretionary arrangement, we are acting as a “investment manager” as such term is defined under ERISA Section 3(38) for purposes of providing the discretionary investment management services only. We act in a manner consistent with the requirements of a fiduciary under ERISA if, based upon the facts and circumstances, such services cause us to be a fiduciary as a matter of law. However, in providing the retirement consulting services, (a) we have no responsibility and do not (i) exercise any discretionary authority or discretionary control respecting management of the client’s retirement plan, (ii) unless it is a discretionary arrangement in which we have agreed to act as an “investment manager” under ERISA Section 3(38), we do not exercise any authority or control respecting management or disposition of assets of the client’s retirement plan or (iii) have any discretionary authority or discretionary responsibility in the administration of the client’s retirement plan or the interpretation of the client’s retirement plan documents; (b) unless it is a discretionary arrangement in which we have agreed to act as an “investment manager” under ERISA Section 3(38), we are not an “investment manager” as defined in Section 3(38) of ERISA and do not have the power to manage, acquire or dispose of any plan assets; (c) unless we have agreed to provide participant advice, we are not a “fiduciary” under ERISA with respect to any particular participant’s plan assets; (d) we are not the “administrator” of the client’s retirement plan as defined in ERISA; and (e) we do not have any “trustee responsibility” as that term is defined in ERISA. The ultimate decision to act on behalf of the plan shall remain with the plan sponsor or other named fiduciary.

We may also assist with participant enrollment meetings and provide investment-related educational seminars and materials to plan participants on such topics as:

- Diversification;
- Asset allocation;
- Risk tolerance; and
- Time horizon

Our educational seminars may include other investment-related topics specific to the particular plan. Although an investment adviser is considered a fiduciary under the Investment Advisers Act of 1940 and is required to meet the fiduciary duties required of an investment adviser, the educational services listed above are not considered fiduciary services for the purposes of ERISA since we are not acting as a fiduciary to the plan as the term “fiduciary” is defined in Section 3(21)(A)(ii) of ERISA. The exact services provided to clients are described in the written agreement between the client and our firm.

We may also provide additional types of retirement consulting services to plans on an individually negotiated basis. All services, whether discussed above or customized for the plan based upon requirements from the plan fiduciaries (which may include additional plan-level or participant-level services) shall be detailed in a written agreement and be consistent with the parameters set forth in the plan documents.

M Financial provides educational, administrative, and technical support for Member Firms at no charge to plan sponsors. This includes professional development, statistical tools, and resources used to benchmark, design, and efficiently obtain competitive proposals from appropriate providers. It also includes providing sales and marketing support to the recordkeeper. The assistance provided by M Financial to its Member Firms may be considered an indirect service to your plan. In providing these

services, M Financial does not act as a fiduciary under ERISA nor as an investment adviser under the Investment Advisers Act of 1940.

Wrap Fee Programs

We do not participate in any wrap fee program.

Types of Investments

We offer advice on equity securities, warrants, corporate debt securities, commercial paper, certificates of deposit, municipal securities, variable life insurance, variable annuities, mutual fund shares, United States government securities, options contracts on securities, options contracts on commodities, futures contracts on tangibles, futures contracts on intangibles, private placements, money market funds, real estate, REITs, PIPEs, derivatives, structured products, ETFs, leveraged ETFs, interests in partnerships investing in real estate and interests in partnerships investing in oil and gas interests.

Additionally, we may advise you on various types of investments based on your stated goals and objectives. We may also provide advice on any type of investment held in your portfolio at the inception of our advisory relationship.

Since our investment strategies and advice are based on each client's specific financial situation, the investment advice we provide to you may be different or conflicting with the advice we give to other clients regarding the same security or investment.

IRA Rollover Recommendations

When we provide investment advice to you regarding your retirement plan account or individual retirement account, we are fiduciaries within the meaning of Title I of the Employee Retirement Income Security Act and/or the Internal Revenue Code, as applicable, which are laws governing retirement accounts. The way we make money creates some conflicts with your interests, so we operate under a special rule that requires us to act in your best interest and not put our interest ahead of yours. Under this special rule's provisions, we must:

- Meet a professional standard of care when making investment recommendations (give prudent advice);
- Never put our financial interests ahead of yours when making recommendations (give loyal advice);
- Avoid misleading statements about conflicts of interest, fees, and investments;
- Follow policies and procedures designed to ensure that we give advice that is in your best interest;
- Charge no more than is reasonable for our services; and
- Give you basic information about conflicts of interest.

We benefit financially from the rollover of your assets from a retirement account to an account that we manage or provide investment advice, because the assets increase our assets under management and, in turn, our advisory fees. As a fiduciary, we only recommend a rollover when we believe it is in your best interest.

Assets Under Management

As of December 31, 2025, we provide continuous management services for \$191,160,236 in client assets on a discretionary basis. We also advise on an additional \$391,897,850 in assets under advisement.

Item 5 Fees and Compensation

Portfolio Management Services

Our fee for portfolio management services is based on a percentage of the assets in your account and is set forth in the following annual tiered fee schedule:

Annual Fee Schedule	
Assets Under Management	Annual Fee
First \$1,000,000	up to 1.50%
\$1,000,001 to \$3,000,000	up to 1.25%
\$3,000,001 to \$5,000,000	up to 1.00%
\$5,000,001 to \$10,000,000	up to 0.75%
Over \$10,000,001	up to 0.50%

Our annual portfolio management fee is billed and payable, quarterly in arrears, based on the average daily balance.

If the portfolio management agreement is executed at any time other than the first day of a calendar quarter, our fees will apply on a pro rata basis, which means that the advisory fee is payable in proportion to the number of days in the quarter for which you are a client. Our advisory fee is negotiable, depending on individual client circumstances. The specific fees will be outlined in the client service agreement.

At our discretion, we may combine the account values of family members living in the same household to determine the applicable advisory fee. For example, we may combine account values for you and your minor children, joint accounts with your spouse, and other types of related accounts. Combining account values may increase the asset total, which may result in your paying a reduced advisory fee based on the available breakpoints in our fee schedule stated above.

We will deduct our fee directly from your account through the qualified custodian holding your funds and securities. We will deduct our advisory fee only when the following requirements are met:

- You provide our firm with written authorization permitting the fees to be paid directly from your account held by the qualified custodian; and
- The qualified custodian agrees to send you a statement, at least quarterly, indicating all amounts disbursed from your account including the amount of the advisory fee paid directly to our firm.

If you have any questions about the statement(s) you receive from the qualified custodian call our main office number located on the cover page of this brochure.

We encourage you to reconcile our invoices with the statement(s) you receive from the qualified custodian. If you find any inconsistent information between our invoice and the statement(s) you receive from the qualified custodian call our main office number located on the cover page of this brochure.

You may terminate the portfolio management agreement upon 30 days written notice. You will incur a pro rata charge for services rendered prior to the termination of the portfolio management agreement, which means you will incur advisory fees only in proportion to the number of days in the quarter for which you are a client. If you have pre-paid advisory fees that we have not yet earned, you will receive a prorated refund of those fees.

Third-Party Managers

In the event that our Firm employs the services of Third-Party Managers in connection with our provision of asset management services, clients will incur an additional amount charged to Enza by any Third-Party Manager (the "Third-Party Management Fee"). The Third-Party Manager Fee is up to 1% of assets under management and is disclosed in a separate disclosure delivered to the client by Enza at or before the time the assets are designated to be managed or advised by that Third-Party Manager. Third-Party Manager fees are separate and in addition to our Advisory Fee. Third-Party Manager fees will apply only to those client assets allocated to the Third-Party Manager.

The fee billing and calculation method will vary based on the Third-Party Manager recommended. Third-Party Managers assess fees in different ways, including quarterly in advance based on the amount of assets under the Third-Party Manager's management as of the last business day of the prior quarter, or quarterly in arrears based on the average daily balance of the Third-Party Managed assets. Third-Party Manager fees will generally be billed to the client by the Third-Party Manager upon its instruction to the custodian. Clients will be provided with a copy of the chosen Third-Party Manager's Form ADV Part 2A Brochure and other disclosure documents detailing exactly how fees are billed and calculated and are encouraged to carefully review those documents.

Individual Consulting and Planning

Adviser's fees for the Individual Consulting and Planning services described in Item 4 (Advisory Business) are based on an hourly rate up to \$450 and depend on the complexity and scope of the requested services. The maximum annual fee we may charge for this service is \$25,000, depending on the size of the client and services provided to that client. Fees are negotiable at our sole discretion. Fees are due and payable upon the completion of the contracted services.

Comprehensive Financial Planning

Adviser's fees for the Comprehensive Financial Planning services described in Item 4 (Advisory Business) are a flat fee and are based on the complexity and scope of the services provided. The maximum fee for this service for individuals is \$15,000. The maximum fee for this service for businesses is \$50,000. Unless otherwise agreed upon, fees are due in full at the time of entering this Agreement. I

Fees are broken down into three levels: Tier I = \$2,500; Tier II = \$5,000; and Tier III = \$7,500. Fees are negotiable and your specific fees will be outlined in your advisory contract. Unless otherwise agreed upon, fees are due in full at the time of entering this Agreement.

Periodic Investment Advisory Consulting Service

Adviser's fees for the Periodic Consulting Services described in Item 4 (Advisory Business) are based on an hourly rate up to \$450 and depend on the complexity and scope of the requested services. The maximum annual fee we may charge for this service is \$25,000, depending on the size of the client and services provided to that client. Fees are negotiable at our sole discretion. Unless otherwise agreed upon, fees are due in full at the time of entering this Agreement.

We will not require prepayment of a fee more than six months in advance and in excess of \$1200.

At our discretion, we may offset our financial planning fees or consulting fees to the extent you implement wealth management services through Enza Financial.

You may terminate the financial planning and consulting agreement upon 30 days written notice to our firm. If you have pre-paid financial planning fees that we have not yet earned, you will receive a prorated refund of those fees. If financial planning fees are payable in arrears, you will be responsible for a prorated fee based on services performed prior to termination of the financial planning agreement.

Retirement Plan Consulting Services

For retirement plan consulting services, we typically charge asset-based fees depending on the time and expenses required to provide contracted services to the plan. The maximum annual asset-based fee we will charge is 1.75%. The fee is typically charged in arrears and calculated either based on the total assets under management on the last day of the billing period selected or based on the average daily balance in the accounts over the billing period. The actual fee will be specified in the client agreement. The plan sponsor may elect for the fee to be paid either by the plan sponsor or out of the plan's assets, and may elect to be charged monthly, quarterly, semi-annually, or annually. In the event that we employ the services of a Third-Party Manager in connection with our provision of 3(38) discretionary management services, clients will incur an additional Third-Party Management Fee charged to Enza by the Third-Party Manager. Please see the section above titled "Third-Party Managers" for additional details.

We may also charge a flat rate fee. The maximum flat fee we charge is \$85,000. This fee may be charged on a recurring basis as selected by the plan, or we may charge a one-time fee per service, or we may charge an hourly fee up to \$450 for services. These fees depend on the scope and complexity of the services rendered and the rate attributable to the person providing services and are negotiable at our sole discretion. Our one-time consulting fee is payable upon completion of the agreed upon consulting services.

You may terminate the retirement plan consulting services agreement by providing notice 30 days prior to the termination date. You will incur a pro rata charge for services rendered prior to the termination of the agreement. If you have pre-paid advisory fees that we have not yet earned, you will receive a prorated refund of those fees. We may charge an hourly rate up to \$450 per hour for services post-termination at our discretion.

Additional Fees and Expenses

As part of our investment advisory services to you, we may invest, or recommend that you invest, in mutual funds and exchange traded funds. The fees that you pay to our firm for investment advisory services are separate and distinct from the fees and expenses charged by mutual funds or exchange traded funds (described in each fund's prospectus) to their shareholders. These fees will generally include a management fee and other fund expenses. You will also incur transaction charges and/or brokerage fees when purchasing or selling securities. These charges and fees are typically imposed by the broker-dealer or custodian through whom your account transactions are executed. We do not share in any portion of the brokerage fees/transaction charges imposed by the broker-dealer or custodian. To fully understand the total cost you will incur, you should review all the fees charged by mutual funds, exchange traded funds, our firm, and others. For information on our brokerage practices, refer to the *Brokerage Practices* section of this brochure.

Compensation for the Sale of Securities or Other Investment Products

Persons providing investment advice on behalf of our firm may be registered representatives with M Holdings Securities, Inc., a securities broker-dealer, and a member of the Financial Industry Regulatory Authority and the Securities Investor Protection Corporation. In their capacity as registered representatives, these persons receive compensation in connection with the purchase and sale of securities or other investment products, including asset-based sales charges, service fees or 12b-1 fees, for the sale or holding, of mutual funds. Compensation earned by these persons in their capacities as registered representatives is separate and in addition to our advisory fees. This practice presents a conflict of interest because persons providing investment advice to advisory clients on behalf of our firm who are registered representatives have an incentive to recommend investment products based on the compensation received rather than solely based on your needs. We resolve this conflict by ensuring recommendations to purchase securities are in the best interest of the client.

Persons providing investment advice to advisory clients on behalf of our firm do not recommend mutual fund share classes that pay 12b-1 fees. For more information, see ADV Part 2B.

Persons providing investment advice on behalf of our firm may be licensed as independent insurance agents with Enza Insurance, LLC. These persons will earn commission-based compensation for selling insurance products, including insurance products they sell to you. Insurance commissions earned by these persons are separate and in addition to our advisory fees. This practice presents a conflict of interest because persons providing investment advice on behalf of our firm who are insurance agents have an incentive to recommend insurance products to you for the purpose of generating commissions rather than solely based on your needs. You are under no obligation, contractually or otherwise, to purchase insurance products through any person affiliated with our firm. For more information, see ADV Part 2B.

We ensure that all recommendations made by persons associated with our firm are in the best interest of the client.

Item 6 Performance-Based Fees and Side-By-Side Management

We do not accept performance-based fees or participate in side-by-side management. Performance-based fees are fees that are based on a share of a capital gains or capital appreciation of a client's account. Side-by-side management refers to the practice of managing accounts that are charged performance-based fees while at the same time managing accounts that are not charged performance-based fees. Our fees are calculated as described in the *Fees and Compensation* section above, and are not charged on the basis of a share of capital gains upon, or capital appreciation of, the funds in your advisory account.

Item 7 Types of Clients

We offer investment advisory services to predominately to individuals, including high net worth individuals. We also provide investment advisory services to businesses.

In general, we do not require a minimum dollar amount to open and maintain an advisory account; however, we have the right to terminate your Account if it falls below a minimum size which, in our sole opinion, is too small to manage effectively.

We may also combine account values for you and your minor children, joint accounts with your spouse, and other types of related accounts to meet the stated minimum.

Item 8 Methods of Analysis, Investment Strategies and Risk of Loss

Our Methods of Analysis and Investment Strategies

We may use one or more of the following methods of analysis or investment strategies when providing investment advice to you:

Charting Analysis - involves the gathering and processing of price and volume pattern information for a particular security, sector, broad index or commodity. This price and volume pattern information is analyzed. The resulting pattern and correlation data is used to detect departures from expected performance and diversification and predict future price movements and trends.

Risk: Our charting analysis may not accurately detect anomalies or predict future price movements. Current prices of securities may reflect all information known about the security and day-to-day

changes in market prices of securities may follow random patterns and may not be predictable with any reliable degree of accuracy.

Technical Analysis - involves studying past price patterns, trends and interrelationships in the financial markets to assess risk-adjusted performance and predict the direction of both the overall market and specific securities.

Risk: The risk of market timing based on technical analysis is that our analysis may not accurately detect anomalies or predict future price movements. Current prices of securities may reflect all information known about the security and day-to-day changes in market prices of securities may follow random patterns and may not be predictable with any reliable degree of accuracy.

Fundamental Analysis - involves analyzing individual companies and their industry groups, such as a company's financial statements, details regarding the company's product line, the experience and expertise of the company's management, and the outlook for the company and its industry. The resulting data is used to measure the true value of the company's stock compared to the current market value.

Risk: The risk of fundamental analysis is that information obtained may be incorrect and the analysis may not provide an accurate estimate of earnings, which may be the basis for a stock's value. If securities prices adjust rapidly to new information, utilizing fundamental analysis may not result in favorable performance.

Cyclical Analysis - a type of technical analysis that involves evaluating recurring price patterns and trends. Economic/business cycles may not be predictable and may have many fluctuations between long-term expansions and contractions.

Risk: The lengths of economic cycles may be difficult to predict with accuracy and therefore the risk of cyclical analysis is the difficulty in predicting economic trends and consequently the changing value of securities that would be affected by these changing trends.

Modern Portfolio Theory - a theory of investment which attempts to maximize portfolio expected return for a given amount of portfolio risk, or equivalently minimize risk for a given level of expected return, by carefully diversifying the proportions of various assets.

Risk: Market risk is that part of a security's risk that is common to all securities of the same general class (stocks and bonds) and thus cannot be eliminated by diversification.

Long-Term Purchases - securities purchased with the expectation that the value of those securities will grow over a relatively long period of time, generally greater than one year.

Risk: Using a long-term purchase strategy generally assumes the financial markets will go up in the long-term which may not be the case. There is also the risk that the segment of the market that you are invested in or perhaps just your particular investment will go down over time even if the overall financial markets advance. Purchasing investments long-term may create an opportunity cost - "locking-up" assets that may be better utilized in the short-term in other investments.

Short-Term Purchases - securities purchased with the expectation that they will be sold within a relatively short period of time, generally less than one year, to take advantage of the securities' short-term price fluctuations.

Risk: Using a short-term purchase strategy generally assumes that we can predict how financial markets will perform in the short-term which may be very difficult and will incur a disproportionately higher amount of transaction costs compared to long-term trading. There are many factors that can affect financial market performance in the short-term (such as short-term interest rate changes, cyclical earnings announcements, etc.) but may have a smaller impact over longer periods of times.

Trading - We may use frequent trading (in general, selling securities within 30 days of purchasing the same securities) as an investment strategy when managing your account(s). Frequent trading is not a fundamental part of our overall investment strategy, but we may use this strategy occasionally when we determine that it is suitable given your stated investment objectives and tolerance for risk. This may include buying and selling securities frequently in an effort to capture significant market gains and avoid significant losses.

Risk: When a frequent trading policy is in effect, there is a risk that investment performance within your account may be negatively affected, particularly through increased brokerage and other transactional costs and taxes.

Our investment strategies and advice may vary depending upon each client's specific financial situation. As such, we determine investments and allocations based upon your predefined objectives, risk tolerance, time horizon, financial information, liquidity needs and other various suitability factors. Your restrictions and guidelines may affect the composition of your portfolio. **It is important that you notify us immediately with respect to any material changes to your financial circumstances, including for example, a change in your current or expected income level, tax circumstances, or employment status.**

Cash Management

We manage cash balances in your account based on the yield, and the financial soundness of the money markets and other short-term instruments.

Tax Considerations

Our strategies and investments may have unique and significant tax implications. However, unless we specifically agree otherwise, and in writing, tax efficiency is not our primary consideration in the management of your assets. Regardless of your account size or any other factors, we strongly recommend that you consult with a tax professional regarding the investing of your assets.

Custodians and broker-dealers must report the cost basis of equities acquired in client accounts. Your custodian will default to the First-In First-Out ("FIFO") accounting method for calculating the cost basis of your investments. You are responsible for contacting your tax advisor to determine if this accounting method is the right choice for you. If your tax advisor believes another accounting method is more advantageous, provide written notice to our firm immediately and we will alert your account custodian of your individually selected accounting method. Decisions about cost basis accounting methods will need to be made before trades settle, as the cost basis method cannot be changed after settlement.

Risk of Loss

Investing in securities involves risk of loss that you should be prepared to bear. We do not represent or guarantee that our services or methods of analysis can or will predict future results, successfully identify market tops or bottoms, or insulate clients from losses due to market corrections or declines. We cannot offer any guarantees or promises that your financial goals and objectives will be met. Past performance is in no way an indication of future performance.

Other Risk Considerations

When evaluating risk, financial loss may be viewed differently by each client and may depend on many different risks, each of which may affect the probability and magnitude of any potential losses. The following risks may not be all-inclusive, but should be considered carefully by a prospective client before retaining our services.

Liquidity Risk: The risk of being unable to sell your investment at a fair price at a given time due to high volatility or lack of active liquid markets. You may receive a lower price or it may not be possible to sell the investment at all.

Credit Risk: Credit risk typically applies to debt investments such as corporate, municipal, and sovereign fixed income or bonds. A bond issuing entity can experience a credit event that could impair or erase the value of an issuer's securities held by a client.

Inflation and Interest Rate Risk: Security prices and portfolio returns will likely vary in response to changes in inflation and interest rates. Inflation causes the value of future dollars to be worth less and may reduce the purchasing power of a client's future interest payments and principal. Inflation also generally leads to higher interest rates which may cause the value of many types of fixed income investments to decline.

Horizon and Longevity Risk: The risk that your investment horizon is shortened because of an unforeseen event, for example, the loss of your job. This may force you to sell investments that you were expecting to hold for the long term. If you must sell at a time that the markets are down, you may lose money. Longevity Risk is the risk of outliving your savings. This risk is particularly relevant for people who are retired, or are nearing retirement.

Recommendation of Particular Types of Securities

We recommend various types of securities and we do not primarily recommend one particular type of security over another since each client has different needs and different tolerance for risk. Each type of security has its own unique set of risks associated with it and it would not be possible to list here all of the specific risks of every type of investment. Even within the same type of investment, risks can vary widely. However, in very general terms, the higher the anticipated return of an investment, the higher the risk of loss associated with the investment. A description of the types of securities we may recommend to you and some of their inherent risks are provided below.

Money Market Funds: A money market fund is technically a security. The fund managers attempt to keep the share price constant at \$1/share. However, there is no guarantee that the share price will stay at \$1/share. If the share price goes down, you can lose some or all of your principal. The U.S. Securities and Exchange Commission ("SEC") notes that "While investor losses in money market funds have been rare, they are possible." In return for this risk, you should earn a greater return on your cash than you would expect from a Federal Deposit Insurance Corporation ("FDIC") insured savings account (money market funds are not FDIC insured). Next, money market fund rates are variable. In other words, you do not know how much you will earn on your investment next month. The rate could go up or go down. If it goes up, that may result in a positive outcome. However, if it goes down and you earn less than you expected to earn, you may end up needing more cash. A final risk you are taking with money market funds has to do with inflation. Because money market funds are considered to be safer than other investments like stocks, long-term average returns on money market funds tends to be less than long term average returns on riskier investments. Over long periods of time, inflation can eat away at your returns.

Certificates of Deposit: Certificates of deposit ("CD") are generally a safe type of investment since they are insured by the Federal Deposit Insurance Company ("FDIC") up to a certain amount. However, because the returns are generally low, there is risk that inflation outpaces the return of the

CD. Certain CDs are traded in the market place and not purchased directly from a banking institution. In addition to trading risk, when CDs are purchased at a premium, the premium is not covered by the FDIC.

Municipal Securities: Municipal securities, while generally thought of as safe, can have significant risks associated with them including, but not limited to: the credit worthiness of the governmental entity that issues the bond; the stability of the revenue stream that is used to pay the interest to the bondholders; when the bond is due to mature; and, whether or not the bond can be "called" prior to maturity. When a bond is called, it may not be possible to replace it with a bond of equal character paying the same amount of interest or yield to maturity.

Bonds: Corporate debt securities (or "bonds") are typically safer investments than equity securities, but their risk can also vary widely based on: the financial health of the issuer; the risk that the issuer might default; when the bond is set to mature; and, whether or not the bond can be "called" prior to maturity. When a bond is called, it may not be possible to replace it with a bond of equal character paying the same rate of return.

Stocks: There are numerous ways of measuring the risk of equity securities (also known simply as "equities" or "stock"). In very broad terms, the value of a stock depends on the financial health of the company issuing it. However, stock prices can be affected by many other factors including, but not limited to the class of stock (for example, preferred or common); the health of the market sector of the issuing company; and, the overall health of the economy. In general, larger, better established companies ("large cap") tend to be safer than smaller start-up companies ("small cap") are but the mere size of an issuer is not, by itself, an indicator of the safety of the investment.

Mutual Funds and Exchange Traded Funds: Mutual funds and exchange traded funds ("ETF") are professionally managed collective investment systems that pool money from many investors and invest in stocks, bonds, short-term money market instruments, other mutual funds, other securities, or any combination thereof. The fund will have a manager that trades the fund's investments in accordance with the fund's investment objective. While mutual funds and ETFs generally provide diversification, risks can be significantly increased if the fund is concentrated in a particular sector of the market, primarily invests in small cap or speculative companies, uses leverage (i.e., borrows money) to a significant degree, or concentrates in a particular type of security (i.e., equities) rather than balancing the fund with different types of securities. ETFs differ from mutual funds since they can be bought and sold throughout the day like stock and their price can fluctuate throughout the day. The returns on mutual funds and ETFs can be reduced by the costs to manage the funds. Also, while some mutual funds are "no load" and charge no fee to buy into, or sell out of, the fund, other types of mutual funds do charge such fees which can also reduce returns. Mutual funds can also be "closed end" or "open end". So-called "open end" mutual funds continue to allow in new investors indefinitely whereas "closed end" funds have a fixed number of shares to sell which can limit their availability to new investors.

ETFs may have tracking error risks. For example, the ETF investment adviser may not be able to cause the ETF's performance to match that of its Underlying Index or other benchmark, which may negatively affect the ETF's performance. In addition, for leveraged and inverse ETFs that seek to track the performance of their Underlying Indices or benchmarks on a daily basis, mathematical compounding may prevent the ETF from correlating with performance of its benchmark. In addition, an ETF may not have investment exposure to all of the securities included in its Underlying Index, or its weighting of investment exposure to such securities may vary from that of the Underlying Index. Some ETFs may invest in securities or financial instruments that are not included in the Underlying Index, but which are expected to yield similar performance.

Commercial Paper: Commercial paper ("CP") is, in most cases, an unsecured promissory note that is issued with a maturity of 270 days or less. Being unsecured the risk to the investor is that the issuer may default. There is less risk in asset based commercial paper (ABCP). The difference between ABCP and CP is that instead of being an unsecured promissory note representing an obligation of the issuing company, ABCP is backed by securities. Therefore, the perceived quality of the ABCP depends on the underlying securities.

Variable Annuities: A variable annuity is a form of insurance where the seller or issuer (typically an insurance company) makes a series of future payments to a buyer (annuitant) in exchange for the immediate payment of a lump sum (single-payment annuity) or a series of regular payments (regular-payment annuity). The payment stream from the issuer to the annuitant has an unknown duration based principally upon the date of death of the annuitant. At this point, the contract will terminate and the remainder of the funds accumulated forfeited unless there are other annuitants or beneficiaries in the contract. Annuities can be purchased to provide an income during retirement. Unlike fixed annuities that make payments in fixed amounts or in amounts that increase by a fixed percentage, variable annuities, pay amounts that vary according to the performance of a specified set of investments, typically bond and equity mutual funds. Many variable annuities typically impose asset-based sales charges or surrender charges for withdrawals within a specified period. Variable annuities may impose a variety of fees and expenses, in addition to sales and surrender charges, such as mortality and expense risk charges; administrative fees; underlying fund expenses; and charges for special features, all of which can reduce the return. Earnings in a variable annuity do not provide all the tax advantages of 401(k)s and other before-tax retirement plans. Once the investor starts withdrawing money from their variable annuity, earnings are taxed at the ordinary income rate, rather than at the lower capital gains rates applied to other non-tax-deferred vehicles which are held for more than one year. Proceeds of most variable annuities do not receive a "step-up" in cost basis when the owner dies like stocks, bonds and mutual funds do. Some variable annuities offer "bonus credits." These are usually not free. In order to fund them, insurance companies typically impose mortality and expense charges and surrender charge periods. In an exchange of an existing annuity for a new annuity (so-called 1035 exchanges), the new variable annuity may have a lower contract value and a smaller death benefit; may impose new surrender charges or increase the period of time for which the surrender charge applies; may have higher annual fees; and provide another commission for the broker.

Real Estate: Real estate is increasingly being used as part of a long-term core strategy due to increased market efficiency and increasing concerns about the future long-term variability of stock and bond returns. In fact, real estate is known for its ability to serve as a portfolio diversifier and inflation hedge. However, the asset class still bears a considerable amount of market risk. Real estate has shown itself to be very cyclical, somewhat mirroring the ups and downs of the overall economy. In addition to employment and demographic changes, real estate is also influenced by changes in interest rates and the credit markets, which affect the demand and supply of capital and thus real estate values. Along with changes in market fundamentals, investors wishing to add real estate as part of their core investment portfolios need to look for property concentrations by area or by property type. Because property returns are directly affected by local market basics, real estate portfolios that are too heavily concentrated in one area or property type can lose their risk mitigation attributes and bear additional risk by being too influenced by local or sector market changes.

Real Estate Investment Trust: A real estate investment trust ("REIT") is a corporate entity which invests in real estate and/or engages in real estate financing. A REIT reduces or eliminates corporate income taxes. REITs can be publicly or privately held. Public REITs may be listed on public stock exchanges. REITs are required to declare 90% of their taxable income as dividends, but they actually pay dividends out of funds from operations, so cash flow has to be strong or the REIT must either dip into reserves, borrow to pay dividends, or distribute them in stock (which causes dilution). After 2012, the IRS stopped permitting stock dividends. Most REITs must refinance or erase large balloon debts

periodically. The credit markets are no longer frozen, but banks are demanding, and getting, harsher terms to re-extend REIT debt. Some REITs may be forced to make secondary stock offerings to repay debt, which will lead to additional dilution of the stockholders. Fluctuations in the real estate market can affect the REIT's value and dividends.

Limited Partnerships: A limited partnership is a financial affiliation that includes at least one general partner and a number of limited partners. The partnership invests in a venture, such as real estate development or oil exploration, for financial gain. The general partner has management authority and unlimited liability. The general partner runs the business and, in the event of bankruptcy, is responsible for all debts not paid or discharged. The limited partners have no management authority and their liability is limited to the amount of their capital commitment. Profits are divided between general and limited partners according to an arrangement formed at the creation of the partnership. The range of risks are dependent on the nature of the partnership and disclosed in the offering documents if privately placed. Publicly traded limited partnership have similar risk attributes to equities. However, like privately placed limited partnerships their tax treatment is under a different tax regime from equities. You should speak to your tax adviser in regard to their tax treatment.

Warrants: A warrant is a derivative (security that derives its price from one or more underlying assets) that confers the right, but not the obligation, to buy or sell a security – normally an equity – at a certain price before expiration. The price at which the underlying security can be bought or sold is referred to as the exercise price or strike price. Warrants that confer the right to buy a security are known as call warrants; those that confer the right to sell are known as put warrants. Warrants are in many ways similar to options. The main difference between warrants and options is that warrants are issued and guaranteed by the issuing company, whereas options are traded on an exchange and are not issued by the company. Also, the lifetime of a warrant is often measured in years, while the lifetime of a typical option is measured in months. Warrants do not pay dividends or come with voting rights.

Options Contracts: Options are complex securities that involve risks and are not suitable for everyone. Option trading can be speculative in nature and carry substantial risk of loss. It is generally recommended that you only invest in options with risk capital. An option is a contract that gives the buyer the right, but not the obligation, to buy or sell an underlying asset at a specific price on or before a certain date (the "expiration date"). The two types of options are calls and puts:

A call gives the holder the right to buy an asset at a certain price within a specific period of time. Calls are similar to having a long position on a stock. Buyers of calls hope that the stock will increase substantially before the option expires.

A put gives the holder the right to sell an asset at a certain price within a specific period of time. Puts are very similar to having a short position on a stock. Buyers of puts hope that the price of the stock will fall before the option expires.

Selling options is more complicated and can be even riskier.

The option trading risks pertaining to options buyers are:

- Risk of losing your entire investment in a relatively short period of time.
- The risk of losing your entire investment increases if, as expiration nears, the stock is below the strike price of the call (for a call option) or if the stock is higher than the strike price of the put (for a put option).
- European style options which do not have secondary markets on which to sell the options prior to expiration can only realize its value upon expiration.
- Specific exercise provisions of a specific option contract may create risks.

- Regulatory agencies may impose exercise restrictions, which stops you from realizing value.

The option trading risks pertaining to options sellers are:

- Options sold may be exercised at any time before expiration.
- Covered Call traders forgo the right to profit when the underlying stock rises above the strike price of the call options sold and continues to risk a loss due to a decline in the underlying stock.
- Writers of Naked Calls risk unlimited losses if the underlying stock rises.
- Writers of Naked Puts risk substantial losses if the underlying stock drops.
- Writers of naked positions run margin risks if the position goes into significant losses. Such risks may include liquidation by the broker.
- Writers of call options could lose more money than a short seller of that stock could on the same rise on that underlying stock. This is an example of how the leverage in options can work against the option trader.
- Writers of Naked Calls are obligated to deliver shares of the underlying stock if those call options are exercised.
- Call options can be exercised outside of market hours such that effective remedy actions cannot be performed by the writer of those options.
- Writers of stock options are obligated under the options that they sold even if a trading market is not available or that they are unable to perform a closing transaction.
- The value of the underlying stock may surge or ditch unexpectedly, leading to automatic exercises.

Other option trading risks are:

- The complexity of some option strategies is a significant risk on its own.
- Option trading exchanges or markets and option contracts themselves are open to changes at all times.
- Options markets have the right to halt the trading of any options, thus preventing investors from realizing value.
- Risk of erroneous reporting of exercise value.
- If an options brokerage firm goes insolvent, investors trading through that firm may be affected.
- Internationally traded options have special risks due to timing across borders.

Risks that are not specific to options trading include market risk, sector risk and individual stock risk. Option trading risks are closely related to stock risks, as stock options are a derivative of stocks.

PIPES: In a Private Investment in Public Equity ("PIPE") transaction, investors typically purchase securities directly from a publicly traded company in a private placement. Depending on the structure of the transaction, this can be done at a premium to or at a discount from the market price of the company's common stock. Because the sale of the securities is not pre-registered with the U.S. Securities and Exchange Commission ("SEC"), the securities are "restricted" and cannot be immediately resold by the investors into the public markets. Accordingly, the company will usually agree as part of the PIPE transaction to register the restricted securities with the SEC. Thus, the PIPE transaction can offer the company the speed and predictability of a private placement, while providing investors with a nearly liquid security. Risks of investing in PIPES include but may not be limited to substantial entry requirements, limited liquidity, limited investor control, potential for unfunded commitments, and loss of investment.

Derivatives: Derivatives are types of investments where the investor does not own the underlying asset. There are many different types of derivative instruments, including, but not limited to, options, swaps, futures, and forward contracts. Derivatives have numerous uses as well as various risks associated with them, but they are generally considered an alternative way to participate in the market. Investors typically use derivatives for three reasons: to hedge a position, to increase leverage, or to speculate on an asset's movement. The key to making a sound investment is to fully understand the characteristics and risks associated with the derivative, including, but not limited to counter-party, underlying asset, price, and expiration risks. The use of a derivative only makes sense if the investor is fully aware of the risks and understands the impact of the investment within a portfolio strategy. Due to the variety of available derivatives and the range of potential risks, a detailed explanation of derivatives is beyond the scope of this disclosure.

Structured Products: A structured product, also known as a market-linked product, is generally a pre-packaged investment strategy based on derivatives, such as a single security, a basket of securities, options, indices, commodities, debt issuances, and/or foreign currencies, and to a lesser extent, swaps. Structured products are usually issued by investment banks or affiliates thereof. They have a fixed maturity, and have two components: a note and a derivative. The derivative component is often an option. The note provides for periodic interest payments to the investor at a predetermined rate, and the derivative component provides for the payment at maturity. Some products use the derivative component as a put option written by the investor that gives the buyer of the put option the right to sell to the investor the security or securities at a predetermined price. Other products use the derivative component to provide for a call option written by the investor that gives the buyer of the call option the right to buy the security or securities from the investor at a predetermined price. A feature of some structured products is a "principal guarantee" function, which offers protection of principal if held to maturity. However, these products are not always Federal Deposit Insurance Corporation insured; they may only be insured by the issuer, and thus have the potential for loss of principal in the case of a liquidity crisis, or other solvency problems with the issuing company. Investing in structured products involves a number of risks including but not limited to: fluctuations in the price, level or yield of underlying instruments, interest rates, currency values and credit quality; substantial loss of principal; limits on participation in any appreciation of the underlying instrument; limited liquidity; credit risk of the issuer; conflicts of interest; and, other events that are difficult to predict.

Private Placements: A private placement (non-public offering) is an illiquid security sold to accredited investors and are not publicly traded nor registered with the Securities and Exchange Commission.

Risk: Private placements generally carry a higher degree of risk due to illiquidity. Most securities that are acquired in a private placement will be restricted securities and must be held for an extended amount of time and therefore cannot be sold easily. The range of risks are dependent on the nature of the partnership and are disclosed in the offering documents.

Item 9 Disciplinary Information

We are required to disclose the facts of any legal or disciplinary events that are material to a client's evaluation of our advisory business or the integrity of our management. We do not have any required disclosures under this item.

Item 10 Other Financial Industry Activities and Affiliations

We have not provided information on other financial industry activities and affiliations because we do not have any relationship or arrangement that is material to our advisory business or to our clients with any of the types of entities listed below.

1. investment company or other pooled investment vehicle (including a mutual fund, closed-end investment company, unit investment trust, private investment company or "hedge fund," and offshore fund);
2. other investment adviser or financial planner;
3. futures commission merchant, commodity pool operator, or commodity trading adviser;
4. banking or thrift institution;
5. accountant or accounting firm;
6. lawyer or law firm;
7. pension consultant;
8. real estate broker or dealer; and/or
9. sponsor or syndicator of limited partnerships.

Registrations with Broker-Dealer

Persons providing investment advice on behalf of our firm may be registered representatives with M Holdings Securities, Inc. a securities broker-dealer, and a member of the Financial Industry Regulatory Authority and the Securities Investor Protection Corporation. The registered representatives conduct suitability reviews. We ensure that these recommendations are in the best interest of the client. See the *Fees and Compensation* section in this brochure for more information on the compensation received by registered representatives who are affiliated with our firm.

Licensed Insurance Agents

Persons providing investment advice on behalf of our firm may be licensed insurance agents licensed with Enza Insurance, LLC, an affiliate of Enza Financial, LLC. These persons will earn commission-based compensation for selling insurance products, including insurance products they sell to you. In addition, Enza Insurance, LLC, an affiliate of Enza Financial, LLC will earn insurance commissions. Insurance commissions earned by these persons are separate and in addition to our advisory fees. This practice presents a conflict of interest because persons providing investment advice on behalf of our firm who are insurance agents have an incentive to recommend insurance products to you for the purpose of generating commissions rather than solely based on your needs. You are under no obligation, contractually or otherwise, to purchase insurance products through any person affiliated with our firm.

Enza Insurance, LLC is also a Member Firm ("Member Firm") of M Financial Group. M Financial Group and its subsidiaries provide to Member Firms a variety of support services, including product design and marketing assistance and training for Member Firm employees and independent contractors, as well as access to securities-related products and services. M Financial Group (on behalf of unaffiliated financial service providers) has direct dealings with Member Firm clients at the request of a Member Firm, typically in conjunction with a Member Firm client presentation or proposal.

Member Firms are free to offer products and services provided by other financial service providers and are not required to offer proprietary products or services designed or promoted by M Financial Group. M Financial Group develops life insurance products in conjunction with unaffiliated insurance companies, which products can be offered only through M Financial Group, its Member Firms and their affiliated producers. These proprietary products may include pricing advantages and other features that benefit the highly affluent clientele primarily marketed to by Member Firms.

M Financial Group shares are mostly owned by or associated with Member Firms and some of their affiliated producers. As stockholders, they share in the profits of M Financial Group via periodic stock or cash dividends. The ownership or control of shares is a conflict of interest for us as it incentivizes maximizing our compensation. We address this conflict through maintaining policies and procedures designed to assure Clients are recommended products or programs that are in their best interest, through this disclosure and through our Code of Ethics.

M Financial Group also maintains a Member Firm Compensation Plan pursuant to which it annually distributes to Plan Participants (e.g., Member Firms or their producers) most of M Financial Group's consolidated net cash profits. Although distributions under the Plan are, to some extent, averaged among the various Member Firms, lines of business, and cost centers of M Financial Group, a significant portion of Plan distributions are made in proportion to the revenue that a Member Firm generates and persistency of inforce insurance. Member Firms and producers do not receive credit under the Plan for business deriving from retirement accounts which are subject to ERISA. Compensating persistency of inforce business creates a conflict of interest where a client may be better served through considering a different insurance policy. We address this conflict through enforcement of our Code of Ethics and this disclosure to you.

Distributions of dividends and other compensation paid by M Financial Group to Member Firms or their producers are in addition to compensation paid to producers by unaffiliated insurance carriers and other financial service providers. Many Member Firms remit these distributions to their owners or individual producers (in some cases in proportion to business generated). Additionally, M Financial Group may provide benefits and non-cash compensation to Member Firms and their affiliated producers. These include, but are not limited to, subsidized expenses, meetings, and trips.

Item 11 Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

Description of Our Code of Ethics

We strive to comply with applicable laws and regulations governing our practices. Therefore, our Code of Ethics includes guidelines for professional standards of conduct for persons associated with our firm. Our goal is to protect your interests at all times and to demonstrate our commitment to our fiduciary duties of honesty, good faith, and fair dealing with you. All persons associated with our firm are expected to adhere strictly to these guidelines. Persons associated with our firm are also required to report any violations of our Code of Ethics. Additionally, we maintain and enforce written policies reasonably designed to prevent the misuse or dissemination of material, non-public information about you or your account holdings by persons associated with our firm.

Clients or prospective clients may obtain a copy of our Code of Ethics by contacting us at the telephone number on the cover page of this brochure.

Participation or Interest in Client Transactions

Neither our firm nor any persons associated with our firm has any material financial interest in client transactions beyond the provision of investment advisory services as disclosed in this brochure.

Personal Trading Practices

Our firm or persons associated with our firm may buy or sell the same securities that we recommend to you or securities in which you are already invested. A conflict of interest exists in such cases because we have the ability to trade ahead of you and potentially receive more favorable prices than you will receive. To mitigate this conflict of interest, it is our policy that neither our firm nor persons associated with our firm shall have priority over your account in the purchase or sale of securities.

Aggregated Trading

Our firm or persons associated with our firm may buy or sell securities for you at the same time we or persons associated with our firm buy or sell such securities for our own account. We may also combine our orders to purchase securities with your orders to purchase securities ("aggregated trading"). Refer to the *Brokerage Practices* section in this brochure for information on our aggregated trading practices.

A conflict of interest exists in such cases because we have the ability to trade ahead of you and potentially receive more favorable prices than you will receive. To eliminate this conflict of interest, it is our policy that neither our firm nor persons associated with our firm shall have priority over your account in the purchase or sale of securities.

Item 12 Brokerage Practices

We recommend the brokerage and custodial services of Charles Schwab ("Custodian"). While you are free to choose any broker-dealer or other service provider as your custodian, we recommend that you establish an account with a brokerage firm with which we have an existing relationship. Such relationships may include benefits provided to our firm, including but not limited to market information and administrative services that help our firm manage your account(s). We believe that the recommended broker-dealers provide quality execution services for our clients at competitive prices. Price is not the sole factor we consider in evaluating best execution. We also consider the quality of the brokerage services provided by recommended broker-dealers, including the value of the firm's reputation, execution capabilities, commission rates, and responsiveness to our clients and our firm. In recognition of the value of the services recommended broker-dealers provide, you may pay higher commissions and/or trading costs than those that may be available elsewhere.

Research and Other Soft Dollar Benefits

Schwab Advisor Services™ is Schwab's business serving independent investment advisory firms like us. They provide our clients and us with access to their institutional brokerage services (trading, custody, reporting and related services), many of which are not typically available to Schwab retail customers. However, certain retail investors may be able to get institutional brokerage services from Schwab without going through us. Schwab also makes available various support services. Some of those services help us manage or administer our clients' accounts, while others help us manage and grow our business. Schwab's support services are generally available on an unsolicited basis (we don't have to request them) and at no charge to us. Following is a more detailed description of Schwab's support services:

Services that benefit you: Schwab's institutional brokerage services include access to a broad range of investment products, execution of securities transactions, and custody of client assets. The investment products available through Schwab include some to which we might not otherwise have access or that would require a significantly higher minimum initial investment by our clients. Schwab's services described in this paragraph generally benefit you and your account.

Services that do not directly benefit you: Schwab also makes available to us other products and services that benefit us but do not directly benefit you or your account. These products and services assist us in managing and administering our clients' accounts and operating our firm. They include investment research, both Schwab's own and that of third parties. We use this research to service all or a substantial number of our clients' accounts, including accounts not maintained at Schwab. In addition to investment research, Schwab also makes available software and other technology that:

- provide access to client account data (such as duplicate trade confirmations and account statements)
- facilitate trade execution and allocate aggregated trade orders for multiple client accounts
- provide pricing and other market data
- facilitate payment of our fees from our clients' accounts
- assist with back-office functions, recordkeeping, and client reporting

Services that generally benefit only us: Schwab also offers other services intended to help us manage and further develop our business enterprise. These services include:

- Educational conferences and events
- Consulting on technology and business needs
- Consulting on legal and compliance related needs
- Publications and conferences on practice management and business succession
- Access to employee benefits providers, human capital consultants, and insurance providers
- Marketing consulting and support Schwab provides some of these services itself. In other cases, it will arrange for third-party vendors to provide the services to us. Schwab also discounts or waives its fees for some of these services or pays all or a part of a third party's fees.

Schwab also provides us with other benefits, such as occasional business entertainment of our personnel. If you did not maintain your account with Schwab, we would be required to pay for those services from our own resources.

Our interest in Schwab's services: The availability of these services from Schwab benefits us because we do not have to produce or purchase them. We don't have to pay for Schwab's services. Schwab has also agreed to pay for certain technology, research, marketing, and compliance consulting products and services on our behalf [once the value of our clients' assets in accounts at Schwab reaches certain thresholds.

These services are not contingent upon us committing any specific amount of business to Schwab in trading commissions or assets in custody. The fact that we receive these benefits from Schwab is an incentive for us to recommend the use of Schwab rather than making such a decision based exclusively on your interest in receiving the best value in custody services and the most favorable execution of your transactions. This is a conflict of interest. We mitigate this conflict by ensuring that the recommendation to trade through Schwab is in the best interest of the client.

Economic Benefits

As a registered investment adviser, we have access to the institutional platform of your account custodian. As such, we will also have access to research products and services from your account custodian and/or other brokerage firm. Such research products and services are provided to all investment advisers that utilize the institutional services platforms of these firms, and are not considered to be paid for with soft dollars. However, you should be aware that the commissions charged by a particular broker for a particular transaction or set of transactions may be greater than the amounts another broker who did not provide research services or products might charge.

Brokerage for Client Referrals

We do not receive client referrals from broker-dealers in exchange for cash or other compensation, such as brokerage services or research.

Directed Brokerage

Persons providing investment advice on behalf of our firm who are registered representatives of M Holdings Securities, Inc. would normally be required to recommend M Holdings Securities, Inc. to you for brokerage services. These individuals are subject to applicable industry rules that restrict them from conducting securities transactions away from M Holdings Securities, Inc. unless M Holdings Securities, Inc. provides the representatives with written authorization to do so, which M Holdings Securities, Inc. has done in this case.

Therefore, although these individuals would generally be limited to conducting securities transactions through M Holdings Securities, Inc., in this instance, as noted above, they will generally recommend Charles Schwab. It may be the case that Charles Schwab charges higher transaction costs and/or custodial fees than another broker charges for the same types of services. However, if transactions

were executed through M Holdings Securities, Inc. these individuals (in their separate capacities as registered representatives of M Holdings Securities, Inc.) could earn commission-based compensation as a result of placing the recommended securities transactions through M Holdings Securities, Inc.. This practice would present a conflict of interest because these registered representatives would have an incentive to effect securities transactions for the purpose of generating commissions rather than solely based on your needs.

You may utilize the broker-dealer of your choice and have no obligation to purchase or sell securities through such broker as we recommend. However, if you do not use the recommended broker we may not be able to accept your account. See the Fees and Compensation section in this brochure for more information on the compensation received by registered representatives who are affiliated with our firm.

Aggregated Trades

When rebalancing across accounts, we combine multiple orders for shares of the same securities purchased for discretionary advisory accounts we manage (this practice is commonly referred to as "aggregated trading"). We will only conduct block trading when rebalancing across accounts. We will then distribute a portion of the shares to participating accounts in a fair and equitable manner. Generally, participating accounts will pay a fixed transaction cost regardless of the number of shares transacted. In certain cases, each participating account pays an average price per share for all transactions and pays a proportionate share of all transaction costs on any given day. In the event an order is only partially filled, the shares will be allocated to participating accounts in a fair and equitable manner, typically in proportion to the size of each client's order. Accounts owned by our firm or persons associated with our firm may participate in aggregated trading with your accounts; however, they will not be given preferential treatment.

We do not aggregate trades for non-discretionary accounts. Accordingly, non-discretionary accounts may pay different costs than discretionary accounts pay. If you enter into non-discretionary arrangements with our firm, we may not be able to buy and sell the same quantities of securities for you and you may pay higher commissions, fees, and/or transaction costs than clients who enter into discretionary arrangements with our firm.

Item 13 Review of Accounts

Your Investment Adviser Representative will monitor your accounts on an ongoing basis and will conduct account reviews at least annually, to ensure the advisory services provided to you are consistent with your investment needs and objectives. Additional reviews may be conducted based on various circumstances, including, but not limited to:

- contributions and withdrawals;
- year-end tax planning;
- market moving events;
- security specific events; and/or
- changes in your risk/return objectives.

The Investment Adviser Representative conducting reviews may vary from time to time, as personnel join or leave our firm.

We will not provide you with regular written reports. You will receive trade confirmations and monthly or quarterly statements from your account custodian(s).

Your Investment Adviser Representative will review financial plans as needed, depending on the arrangements made with you at the inception of your advisory relationship to ensure that the advice provided is consistent with your investment needs and objectives. Generally, we will contact you periodically to determine whether any updates may be needed based on changes in your circumstances. Changed circumstances may include, but are not limited to marriage, divorce, birth, death, inheritance, lawsuit, retirement, job loss and/or disability, among others. We recommend meeting with you at least annually to review and update your plan if needed. Additional reviews will be conducted upon your request. Such reviews and updates may be subject to our then current hourly rate. We will not provide regular written reports for financial planning and consulting services. If you implement financial planning advice, you will receive trade confirmations and monthly or quarterly statements from relevant custodians. Fees for financial planning and portfolio management services are described in *Item 5 Fees and Compensation*.

Item 14 Client Referrals and Other Compensation

As disclosed under the *Fees and Compensation* section in this brochure, persons providing investment advice on behalf of our firm may be licensed insurance agents with Enza Insurance, LLC, and are registered representatives with M Holdings Securities, Inc., a securities broker-dealer, and a member of the Financial Industry Regulatory Authority and the Securities Investor Protection Corporation. For information on the conflicts of interest this presents, and how we address these conflicts, refer to the *Fees and Compensation* section.

We do not receive any compensation from any third party in connection with providing investment advice to you nor do we compensate any individual or firm for client referrals.

Refer to the *Brokerage Practices* section above for disclosures on research and other benefits we may receive resulting from our relationship with your account custodian.

Item 15 Custody

As paying agent for our firm, your independent custodian will directly debit your account(s) for the payment of our advisory fees. This ability to deduct our advisory fees from your accounts causes our firm to exercise limited custody over your funds or securities.

We also have custody due to our standing authority to make third-party transfers on behalf of our clients who have granted us this authority. This authority is granted to us by the client through the use of a standing letter of authorization (“LOA”) established by the client with his or her qualified custodian. The standing LOA authorizes our Firm to disburse funds to one or more third parties specifically designated by the client pursuant to the terms of the LOA and can be changed or revoked by the client at any time. We have implemented the safeguard requirements of SEC regulations by requiring safekeeping of your funds and securities by a qualified custodian. We have further implemented procedures to comply with the requirements outlined by the SEC in its February 21, 2017, No-Action Letter to the Investment Adviser Association.

We do not have physical custody of any of your funds and/or securities. Your funds and securities will be held with a bank, broker-dealer, or other qualified custodian. You will receive account statements from the qualified custodian(s) holding your funds and securities at least quarterly. The account statements from your custodian(s) will indicate the amount of our advisory fees deducted from your account(s) each billing period. You should carefully review account statements for accuracy.

Item 16 Investment Discretion

Before we can buy or sell securities on your behalf, you must first sign our discretionary management agreement and the appropriate trading authorization forms.

You may grant our firm discretion over the selection and amount of securities to be purchased or sold for your account(s) without obtaining your consent or approval prior to each transaction. You may specify investment objectives, guidelines, and/or impose certain conditions or investment parameters for your account(s). For example, you may specify that the investment in any particular stock or industry should not exceed specified percentages of the value of the portfolio and/or restrictions or prohibitions of transactions in the securities of a specific industry or security. Refer to the *Advisory Business* section in this brochure for more information on our discretionary management services.

If you enter into non-discretionary arrangements with our firm, we will obtain your approval prior to the execution of any transactions for your account(s). You have an unrestricted right to decline to implement any advice provided by our firm on a non-discretionary basis.

Item 17 Voting Client Securities

We will not vote proxies on behalf of your advisory accounts. At your request, we may offer you advice regarding corporate actions and the exercise of your proxy voting rights. If you own shares of applicable securities, you are responsible for exercising your right to vote as a shareholder.

In most cases, you will receive proxy materials directly from the account custodian. However, in the event we were to receive any written or electronic proxy materials, we would forward them directly to you by mail, unless you have authorized our firm to contact you by electronic mail, in which case, we would forward any electronic solicitations to vote proxies.

Item 18 Financial Information

Our firm does not have any financial condition or impairment that would prevent us from meeting our contractual commitments to you. We do not take physical custody of client funds or securities, or serve as trustee or signatory for client accounts, and, we do not require the prepayment of more than \$1200 in fees six or more months in advance. Therefore, we are not required to include a financial statement with this brochure.

We have not filed a bankruptcy petition at any time in the past ten years.
